HTML **CSS** **Sass** **Bootstrap** **Taildwind**

JavaScript **TypeScript** **React JS / React Native**

BACKEND:

Node JS **Express** **MongoDB** **Firebase**

Supabase

<ABOUT ME>

Fullstack Developer focused on building web and mobile applications using modern technologies such as React, React Native, TypeScript and Supabase.
I have hands-on experience developing full applications, including user interfaces, backend logic, authentication and database management. I also have a background working with the MERN stack (MongoDB, Express, React, Node.js), which allows me to adapt to different environments and architectures.
Additionally, I bring over 15 years of experience in administrative and operational roles, giving me a strong understanding of business processes and the ability to build practical, real-world solutions.
I am currently looking for opportunities as a developer where I can continue growing, contribute value and strengthen my professional experience.

<EXPERIENCE>
