<TECHNICAL SKILLS>

FRONTEND:

HTML CSS Sass Bootstrap Tailwind CSS
 JavaScript TypeScript React JS / React Native

BACKEND:

Node JS Express MongoDB Firebase
 Supabase

<ABOUT ME>

Fullstack Developer focused on building web and mobile applications using modern technologies such as React, React Native, TypeScript and Supabase.

I have hands-on experience developing full applications, including user interfaces, backend logic, authentication and database management. I also have a background working with the MERN stack (MongoDB, Express, React, Node.js), which allows me to adapt to different environments and architectures.

Additionally, I bring over 15 years of experience in administrative and operational roles, giving me a strong understanding of business processes and the ability to build practical, real-world solutions.

I am currently looking for opportunities as a developer where I can continue growing, contribute value and strengthen my professional experience.

<EXPERIENCE>

Fullstack Developer – Upraze (Muscul-arte App) 2026 – Present .

- Development of a gym management application for trainers and students
- Built mobile application using React Native and Expo
